

Supernova Scoop

VOLUME 1, ISSUE 1

SEPTEMBER/OCTOBER 2009

Deliciously Great Writing

Supernovas have exploded into writing!

In September, we wrote our very special recipe for peanut butter and jelly sandwiches. Then we used the recipe to make delicious PB

Supernovas are mega math stars! Every day, students work on solving problems independently. At the beginning of each math lesson, Supernovas work on a problem in his/her math notebook.

treats! Who knew that writing could be so tasty?!

Next, the Supernovas had the idea to write about camping. They made camping encyclopedias that describe

important things to take camping, such as flashlights, sleeping bags and tents.

We ended our camping theme by writing a recipe for s'mores. We followed our recipe and made the s'mores at our campfire party.

Mega Math

Students use math strategies such as acting it out, drawing, or using logic to answer the question. Then Supernovas explain how the strategy was used to solve the problem.

Reading Rock Stars!

Supernovas are reading words, words, and more words! Supernovas are learning to spell new words everyday.

Some students are using letters on blocks to spell new words. You may have also heard of the famous flashlight game that uses a flashlight to practice sounding out new words.

Some students are using noun, verb, and adverb cards to compose complex and silly sentences. Playing word games and word sorts are exciting and fun ways we practice spelling and reading skills.

CHOICE TIME!

The most popular activity at choice time is pretend play. Supernovas have worked together to create a pizza restaurant, a zoo, a fruit stand, and a store. They are even using their math skills to count money and buy toys at choice time!
